

TELTONIKA GLOBAL LITE PLAN

Simple. Tailored. Affordable

SIMPLIFYING IOT WITH GLOBAL CONNECTIVITY

Connectivity for Things uses a global mobile network to link Teltonika devices anywhere. It offers control over connectivity, device activation, and SIM management through an easy-to-use IoT platform, reducing roaming costs and streamlining operations in 45 countries worldwide.

100 MB

1 YEAR

45 COUNTRIES

**SMS AT NO
ADDITIONAL COST**

ONE SUPPLIER - FULL CONNECTIVITY SOLUTION

The fewer suppliers, the more time you save avoiding multiple negotiations, shipping problems, and other issues. Get SIM card and Teltonika GPS tracker in one.

ONE TIME PAYMENT - 100 MB, 1 YEAR

Just one payment and you get Global data bundle of 100 MB for the next 1 year! You can be sure that network providers will not increase the price or change data capacity until your chosen plan ends.

AUTOMATICALLY RENEW THE GLOBAL LITE PLAN

The Auto TOP-UP feature will automatically renew the Global Lite plan under the same commercial conditions when the remaining data volume is used up. With this feature, you no longer need to monitor your data volume as Auto TOP-UP reduces the effort of manual SIM card maintenance and GPS trackers will always be connected without service interruptions.

SPECIFIC COUNTRY COVERAGE

Connectivity network coverage encompasses 45 countries in Europe, America, Asia, and Oceania to avoid any communication disruptions. Usually, several network operators are supported in a country.

ACTIVATION ON DEMAND

The 1 year Global Lite connectivity plan is not activated until a device is turned on and connected to the cellular network. It allows you to have SIM cards in stock for any unforeseen situations.

SIM CARD MANAGEMENT IOT PLATFORM

A state-of-the-art custom-built IoT platform for managing and monitoring all Teltonika SIM cards, suitable for fleets of any size and type. As the IoT platform is custom-built, there is room to modify it to suit any relevant operational requirements.
